ARTIFICIAL INTELLIGENCE  
BCH SMART-CONTRACT

JOIN THE TRADING REVOLUTION

**Be part of the new  
CRYPTO ECONOMY**

iKONBOT

is a *decentralized* trading system where you have artificial intelligence in a

BCH SMART CONTRACT

where a team of traders with the highest *experience and artificial intelligence* developers  
have created a system that creates results **every day.**

JOIN THE TRADING REVOLUTION

# How is this possible?

Through a technology known as PAMM (*Percentage Allocation Money Management*) we carry out all operations in a management account, All transactions are reflected day by day in the accounts of users connected to ours automatically without human interference.

JOIN THE TRADING REVOLUTION

# There is never a need to request withdraws!

The artificial intelligence system with technology combined with a BCH Smart Contract will do all the work for you. iKONBOT will execute payments every day to your smart contract from 2.2% to 5% depending on the payment days of your BCH Smart Contract. iKONBOT will execute your earnings on your account every day with a minimum withdrawal value of .03 BCH in automatic pilot.

**Risk:**  
no human factor!

Remember that the proposed gains are a goal, but if one day the goal is not reached, that day will not be paid, but it will not count on your paydays, it will only be postponed. We are in the CRYPTO ECONOMY AND FOREX market, which is a volatile market and where profits are VARIABLE and there is never a guaranteed profit.
